Search Notes

Dear Examiner Rayyan,

Attached are the search results (from commercial databases) for your case.

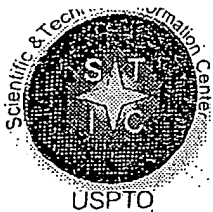

Color tags mark the patents/articles which appear to be most relevant to the case. Pls review all documents, since untagged items might also be of interest. If you wish to order the complete text of any document, pls submit request(s) directly to the EIC2100 Reference Staff located in RND-4B28.

Pls call if you have any questions or suggestions for additional terminology, or a different approach to searching the case. Finally, pls complete the attached Search Results Feedback Form, as the EIC/STIC is continually soliciting examiners' opinion of the search service.

Thanks,
Carol

Is this a "Fast & Focused" Search Request? (Circle One) YES NO

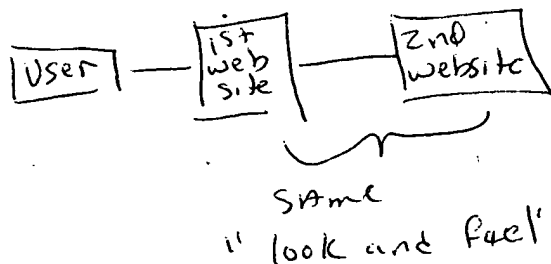

A "Fast & Focused" Search is completed in 2-3 hours (maximum). The search must be on a very specific topic and meet certain criteria. The criteria are posted in EIC2100 and on the EIC2100 NPL Web Page at <http://ptoweb/patents/stic/stic-tc2100.htm>.

What is the topic, novelty, motivation, utility, or other specific details defining the desired focus of this search? Please include the concepts, synonyms, keywords, acronyms, definitions, strategies, and anything else that helps to describe the topic. Please attach a copy of the abstract, background, brief summary, pertinent claims and any citations of relevant art you have found.

A system to enable employees of a company to perform functions for the company (purchase orders, ect). A first electronic information system accessible via first website. First website linked with a second website. ~~the~~ The first and second website having the same "look and feel"

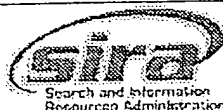

possible search terms:
partnered companies (partnering)
look and feel
transparent

Corporate system runs as a website - access another website transparently

Abstract (Basic): US 20020173973 A1

NOVELTY - An electronic information system provides tools to enable

employees of an identified company to perform employment-related functions. A data engine provides a link that is **transparent** to employees, between the electronic information system and another electronic information system provided by a partner business.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are included for the following:

- (1) Electronic information system; and
- (2) Method for providing tools to employees for performing employment related functions.

USE - For providing web services to employees of identified company to perform employment-related functions such as procurement, finance, sales, training, scheduling vacations, recruiting, personnel management, budgeting, maintaining technological proficiency, problem identification and resolution.

ADVANTAGE - Enables employees to **access** the web **site** to obtain variety of tools related to desired information technology field. Facilitates formation of seamless electronic link and allows employee to **access** the **partner** web **site**.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart explaining the method for providing job function or industry specific tools to employee.

Abstract (Basic): WO 200180056 A2

NOVELTY - Method of communicating between a database and a remote site over a network, comprises: sending a screen definition from the database to the remote site over the network, the screen definition includes a definition for data entry fields; and receiving at the database from the remote **site** data **associated** with less than all of the data entry fields.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(a) method using a computer applet to generate screens and evaluate data;

(b) method using a computer applet to generate screens and transmit data;

(c) method using a computer to retrieve data from database server;

(d) system for providing access to a central database;

(e) system for communicating

USE - For electronic screen displays and electronic data storage and retrieval.

ADVANTAGE - Significantly improves the amount of information, the speed of transmission, overall system performance, and system flexibility. A web-based system functions much more like a standard WINDOWS based system and have a **similar look** and **feel**. Allows for the adding or updating of one or more screen elements on an already existing screen. Provides for variable access and interactivity with multiple users to achieve complex functions in real-time via an Internet/Extranet interface. The present invention may be used in a suite of programs that function as a fully integrated, web-deployed, and interactive data management system.

DESCRIPTION OF DRAWING(S) - The diagram shows the structure of a database

Abstract (Basic): WO 200016210 A1

NOVELTY - An electronic commerce supported page with a **look** and **feel** corresponding to the captured **look** and **feel** description of the host website is served to visitor computers (105a-105c), based on the received activation of the provided link from the visitor computers. The host **website** is **associated** with the provided link and content, based on the commerce object associated with the provided link.

DETAILED DESCRIPTION - Initially, the look and feel description **associated** with a host **website** are captured. A **link** for inclusion within a page on the host website for serving the visitor computer, is provided to the host **website**. The provided **link** correlates the host **website** with a selected commerce object. The selected commerce object is a selected product, selected product category or an indication for dynamic content selection. The content within the served page is dynamically selected, according to the contextual information derived from the page on the host **website** including the provided **link**.

INDEPENDENT CLAIMS are also included for the following:

(a) context sensitive;

(b) **transparent** electronic commerce support pages providing system in internet;

(c) cost effective scramble system for serving dynamically constructed web pages

USE - For providing context sensitive, **transparent** electronic commerce support pages for internet, advertising, etc.

ADVANTAGE - By using primary online sales channel, the merchants

can focus on product development, production and order fulfillment and hence reducing initial cost and improving operational efficiency and potential benefits of internet.

DESCRIPTION OF DRAWING(S) - The figure shows the hardware architecture implementing context sensitive, **transparent** electronic commerce pages providing method.

ABSTRACT EP 812088 A2

A method and system for preserving state in computers communicating over networks, such as the World Wide Web (WWW) using stateless

protocols, e.g., HTTP. State is preserved in a conversation between a client requesting services from a server by performing the service and identifying all continuations (hyperlinks) in an output from the service; recursively embedding the state information in all identified continuations in the output sent to the client. The state information may be embedded and communicated by the server to the client. Alternatively, dynamically downloadable program code may be used to embed the state information at the client. Additional features enable the filtering and/or addition of hyperlinks and data output from the services according to predetermined criteria. State information may be embedded by modifying an identified continuation which is a request for an HTML file, to invoke a CGI converter program with the identified continuation and the state information passed as arguments. State information may also be embedded by modifying an identified continuation which is an invocation to a CGI program with the identified continuation and the state information passed as arguments, and the embedding step is performed by the CGI program. Alternatively, an identified continuation which is an invocation of a CGI program may be modified to invoke a CGI converter program with the identified continuation, an argument counter which indicates a number of arguments associated with the CGI program, and the state information passed as arguments. Here, the embedding is performed by the converter program.

English Abstract

A computer implemented method for procuring services includes establishing a private marketplace with access restricted to a predetermined set of buyers (108) and a predetermined set of vendors (106). The private marketplace owner (104) uses the private marketplace to procure services by inviting bids on a project from a subset of the vendors (106), receiving at least one bid on the project from at least one of the subset of vendors (106), and accepting one of the bids. The users (108) of the private marketplace work with the vendor (106) on the project in a collaborative workspace. The private marketplace owner (104) monitors the marketplace through the use of a series of customized reports.

French Abstract

Cette invention concerne un procede informatique de mise a disposition de services qui consiste a etablir un marche prive dont l'accès est limite a un nombre determine d'acheteurs et de vendeurs. Le detenteur du marche prive utilise ledit marche pour fournir des services en sollicitant des offres pour un projet aupres d'un sous-ensemble de vendeurs, en recevant au moins une offre pour le projet d'au moins un sous-ensemble de vendeurs et en acceptant une des offres. Les utilisateurs du marche prive cooperent au projet avec le vendeur dans le cadre d'un espace de collaboration. Le detenteur prive du marche surveille ledit marche par l'intermediaire d'une serie de rapports personnalises.

Fulltext Word Count: 4471

English Abstract

The invention is a business system that incorporates Affinity organizations and secondary affinity organizations to secure subscribers as buyers for affiliate organization products. In one embodiment, purchases are made through a customizable purchasing platform that, when visited by a subscriber, appears to be a web site administered by the subscriber's partner.

French Abstract

La presente invention concerne un systeme commercial qui comprend des organisations qui ont des affinités et des organisations qui ont des affinités secondaires de façon à sécuriser des abonnés à des produits d'organisations affiliées. Dans un mode de réalisation de l'invention,

les achats sont effectues via une plate forme d'achat personnalisable qui, lorsqu'elle est visitee par un abonne, s'avere etre un site web administre par le partenaire de l'abonne.

English Abstract

A computerized method for automatically generating customized Internet services that are available through an agency. The method comprises providing at least one default service; providing a plurality of attributes; and automatically mapping predetermined attributes selected from the plurality of attributes with the default service, thereby creating a customized Internet service. Alternatively, a computerized method of generating a web page for posting on the Internet. The method comprises providing a page structure; providing a plurality of objects, each object relating to content used to form the web page; and mapping the content with the page structure, thereby creating a web page.

French Abstract

L'invention concerne un procede informatique permettant d'elaborer, de maniere automatique, des services Internet personnalises qui sont disponibles par l'intermediaire d'une agence. Ce procede consiste a fournir au moins un service par default ainsi qu'une pluralite d'attributs; a acheminer, de maniere automatique, les attributs predetermines et selectionnes dans la pluralite d'attributs, creant ainsi un service Internet personnalise. Dans un autre mode de realisation, un procede informatique permet d'elaborer une page web destinee a etre publiee sur Internet. Ce procede consiste a etablir une structure de page et une pluralite d'objets, chaque objet ayant trait au contenu utilise pour creer la page web; et a acheminer le contenu avec la structure de page, creant ainsi une page web.

English Abstract

A computer-based aggregated security investment service (14) interacts with one or more customers (12) via one or more communication links (18). The service allows multiple customers (12) to execute aggregated purchase orders of securities in dollar increments. Customers (12) setting up accounts have the ability to select numerous different types of individual, joint, conventional, or tax advantaged accounts. The present invention also provides a mechanism for reducing the exposure of the investment service to purchases of securities with fluctuating prices by staggering share purchases as two or more sub-orders.

French Abstract

Un service informatise d'investissement sur des titres regroupes (14) interagit avec un ou plusieurs clients (12) par une ou par plusieurs liaisons de communication (18). Le service permet a des clients multiples (12) d'executer des ordres d'achat regroupes de titres par increments en dollars. Les clients (12) ouvrant des comptes ont la possibilite de selectionner de nombreux types differents de comptes individuels, joints, classiques ou a avantages fiscaux. La presente invention concerne egalement un mecanisme de reduction de l'exposition du service d'investissement a des achats de titres aux prix fluctuants par echelonnement des achats d'actions sous la forme de deux sous-ordres ou davantage.

English Abstract

The present invention is directed to an e-commerce outsourcing system and method that provides hosts (105d-f) with transparent, context sensitive e-commerce supported pages over the Internet (110). The look and feel of a target host (105f) is captured for future use (135a-d). The look and feel is captured by receiving the identification of an example page on the target host (105f), retrieving the page (120a-c), identifying the look and feel elements of the identified page (125a-d) and storing the identified elements (135a-d). The host (105f) is provided with links correlating the host with a link for inclusion within a page on the host website for serving to a visitor computer (105a-c), wherein the provided link correlates the host website with a selected commerce object contextually related to material in the page. The commerce object can be

a product, a product category or a dynamic selection indicator. Upon activation of the product link, the visitor computer (105a-c) is served with an e-commerce support page.

French Abstract

L'invention concerne un systeme et un procede d'importation concus pour le commerce electronique permettant de doter des sites hotes (105d-f) de pages supports de commerce electronique sensibles au contexte et transparentes sur Internet (110). On saisit la richesse fonctionnelle d'un site hote voulu (105f) en vue d'une utilisation ulterieure (135a-d). On effectue cette saisie en recevant l'identification d'une page exemple sur le site hote voulu (105f), en extrayant la page (120a-c), en identifiant les elements de la richesse fonctionnelle de la page identifiee (125a-b) et en stockant les elements identifies (135a-d). Le site hote (105f) presente des liaisons permettant d'etablir une correlation entre le site hote et un lien a introduire dans une page sur le site Web hote en vue de desservir un ordinateur visiteur (105-c). Ledit lien etablit une correlation entre le site Web hote et un objet de commerce selectionne, contextuellement relatif aux elements de la page. L'objet de commerce peut etre un produit, une categorie de produits ou un indicateur de selection dynamique. Suite a l'activation du lien produit, l'ordinateur visiteur (105a-c) recoit une page support de commerce electronique.

AU 2003291175 A1 G06F-015/16 Based on patent WO 200461567

Abstract (Basic): US 20040128347 A1

NOVELTY - The system has a portal services module (32) receiving the requests for content from a portal environment. The module retrieves a requested file from a computer, and compares the file to a remote portal catalog to determine whether the file is out of date. The module downloads a newer version of the requested file from a server if the user is online, and provides the requested file to the user via the environment.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for a method for providing content access on a mobile computer.

USE - Used for providing access to a remote content e.g. data and application, residing on local system e.g. laptop, PC, personal digital assistant, or other similar device, and a remote system e.g. LAN, WAN, intranet or internet server, in a remote portal environment.

ADVANTAGE - The portal services module allows multiple applications from multiple vendors to be linked with the portal environment and provides data and applications of same structure, **look** and **feel**, even though the data and applications come from the multiple vendors.

DESCRIPTION OF DRAWING(S) - The drawing shows an overall system architecture of a remote content access providing system.

AU 200132684 A G06F-017/60 Based on patent WO 200135315

Abstract (Basic): WO 200135315 A2

NOVELTY - Each time vendor web site (12) on merchant computer (14) is loaded over network (16) by user browser (10) on user computer (20), a query is made using the web site universal resource locator (22) via network (16) to merchant assurance database (24). Information indicating the merchant record with respect to completing transactions is returned, also included is a hyperlink to additional **business** information about the **site**.

USE - For informing on-line purchasers concerning the business record of e-commerce merchants.

ADVANTAGE - By providing integrity information almost immediately on accessing the merchant web site, the system improves customer confidence and comfort in using on-line purchasing. The system can also persuade vendors using and e-commerce network, such as the Internet, to employ the highest standards.

DESCRIPTION OF DRAWING(S) - The figure illustrates an on-line business performance system.

Merchant computer ((20) User computer ((24) Merchant assurance database. (14)

English Abstract

A system and method for providing remote content access in portal environments operating on is provided. A portal environment executing in a web browser on a local computer (e.g., a laptop, PC, or PDA) allows access to local and remote applications and data. Local and remote applications from multiple vendors are integrated using an application integration service, and access thereto is provided in the portal environment. A portal services module handles requests generated by the user from the portal environment, and determines whether the user is online or offline. If the user is online, a remote portal catalog is downloaded from a remote server, and dates therein are compared to file dates of the requested content to determine whether the local content is out of date. If the local content is out of date, updated versions of the content are downloaded from the remote server to update the local content. The updated content is provided to the user, and is accessible when the user is both online and offline.

French Abstract

L'invention concerne un systeme et un procede fournissant un acces contenu distant dans des environnements en fonctionnement. Un environnement portique execute dans un navigateur sur un ordinateur local (<i>p.ex</i>., un ordinateur portatif, PC ou PDA) donne acces a des

applications locales et distantes et a des donnees. Les applications locales et distantes de differents vendeurs sont integrees a l'aide d'un service d'integration d'application, et leur acces est fourni dans l'environnement portique. Un module de services portique gere les demandes generees par l'utilisateur d'un environnement portique, et determine si l'utilisateur est en ligne ou hors ligne. Si l'utilisateur est en ligne, un catalogue portique distant est telecharge d'un serveur distant, et les dates contenues sont comparees aux dates fichiers du contenu demande pour determiner si le contenu local est perime. Si le contenu local est perime, les versions mises a jour du contenu sont telechargees du serveur distant pour mettre a jour le contenu local. Le contenu mis a jour est mis a disposition de l'utilisateur et est accessible lorsque l'utilisateur est a la fois en ligne et hors ligne.

French Abstract

La presente invention concerne un systeme et un procede de courtage en
marchandises permettant de repondre a des offres de vente de marchandises
par des offres d'achat de ces marchandises. Le procede de l'invention est
mis en oeuvre de facon a augmenter les chances d'atteindre le resultat
que l'on obtiendrait par des transactions personnelles. On utilise une
prime partenaire pour quantifier la relation commerciale entre les
partenaires commerciaux. Le partenaire commercial qui se joint en dernier
lieu a une transaction perd le droit de conclure une meilleure affaire
dans la transaction precitee. L'invention se presente de preference sous
la forme d'un systeme de courtage electronique mis en oeuvre sur un
reseau public tel que l'Internet.

English Abstract

An e-commerce business record system that loads status information about the **business** record of a **web - site** into a cutomer's browser each time the customer browses a merchant's web-site. The status information is obtained by sending a query to an on-line database using the merchant's universal resource locator (URL) as a search term. The status or condition information indicates the merchant record with respect to completing e-commerce transactions. The information returned from the search also includes a hyperlink to additional **business** information about the **site** . The additional information indicates why the site has a particular status. The browser is provided with an icon or button which indicates the status and which can be used to hyperlink to the additional information about the merchant.

French Abstract

L'invention concerne un systeme d'enregistrement de gestion commerciale electronique chargeant des informations d'etat relatives a l'enregistrement de gestion d'un site Web dans un navigateur d'un client chaque fois que le client balaye un site Web commercial. L'information d'etat est obtenue en envoyant une demande a une base de donnees en ligne, en utilisant le systeme universel de localisation des ressources (URL) comme terme de recherche. L'information d'etat ou de condition indique l'enregistrement commercial par rapport a l'achevement des

transactions commerciales electroniques. L'information en retour de la recherche comprend egalement une hyperliaison a l'information de gestion supplementaire concernant le site. L'information supplementaire indique pourquoi le site presente un etat particulier. Le navigateur comporte une icone ou un bouton qui indique l'etat et qui peut etre utilise pour l'hyperliaison a l'information commerciale supplementaire.

English Abstract

French Abstract

L'invention concerne un systeme auxiliaire permettant la commande transparente de transactions de commerce electronique, a travers lequel un individu sans carte de credit peut effectuer des achats sur des sites de vente en ligne. Lors de l'ouverture d'un compte dans le systeme auxiliaire, ce compte peut etre credite au moyen de diverses sources de financement, p. ex. des cartes de credit, des comptes cheques, des mandats, des cheques cadeau, des codes d'interressement, de la monnaie en ligne, des coupons et des cartes a valeur stockee. Un utilisateur possedant un compte credite peut effectuer des achats sur de nombreux sites Web de vente, par l'intermediaire du systeme auxiliaire. Lorsqu'une marchandise est selectionnee, une transaction d'achat est effectuee au cours de laquelle une carte de credit appartenant au systeme auxiliaire est temporairement ou definitivement attribuee a l'utilisateur. La carte de credit, une fois creditee par le compte credite correspondant de l'utilisateur, s'utilise pour conclure la transaction d'achat. Le systeme auxiliaire fournit des commandes comprenant la surveillance des trains de donnees et, par consequent, la commande du flux d'informations entre l'utilisateur et les sites de vente.
